Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

NAMES AND LABELS

▲ Buttons do not have an accessible name	~
▲ Image elements do not have [alt] attributes	~
<pre><frame/> or <iframe> elements do not have a title</iframe></pre>	~
▲ Links do not have a discernible name	~

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

These are opportunities to improve the legibility of your content.
